[Chris De Souza, (Surgeon); Michael E Glasscock, III] -- Provides a detailed discussion of otosclerosis patient diagnosis, treatment, and management. Providing a step-by-step account of stapedectomy surgery, the text also covers the pros and cons of erbium ... Otosclerosis and stapedectomy : diagnosis, management, and ... Otosclerosis is a condition where one or more foci of irregularly laid spongy bone replace part of normally dense enchondral layer of bony otic capsule in the bony labyrinth. This condition affects one of the ossicles (the stapes) resulting in hearing loss, tinnitus, vertigo or a combination of symptoms. The term otosclerosis is something of a misnomer Otosclerosis - Wikipedia Otosclerosis and Stapedectomy. Otosclerosis is a disorder in which abnormal bone forms around the stapes — a tiny bone within your inner ear (cochlea). This abnormal bone growth prevents the stapes from vibrating properly, causing a decrease in hearing, sometimes in both ears. If left untreated, the hearing loss slowly worsens over time. Otosclerosis Treatment & Stapedectomy NYC | Mount Sinai ... Symptoms of otosclerosis . Common symptoms of otosclerosis are gradual hearing loss as well as tinnitus (or ringing in the ears), according to Dr. Waguespack. As well, people with the condition may

experience dizziness or the sensation of vertigo, notes the NIDCD. “Diagnosis is usually straightforward,” says Dr. Waguespack. Otosclerosis and hearing loss: Causes, diagnosis and symptoms Having ear surgery is another option to remove the hearing loss symptoms associated with the condition. A common ear surgery procedure for otosclerosis is a stapedectomy, which involves removing one of the middle ear bones called the stapes and replacing it with a prosthesis. Otosclerosis causes, symptoms, diagnosis and otosclerosis ... provides a detailed and practical discussion of otosclerosis patient diagnosis, treatment, and management. The book presents a step-by-step account of stapedectomy surgery, and also covers: the pros and cons of all lasers including the latest erbium lasers and their current applications; the analysis of recent Otosclerosis and Stapedectomy: Diagnosis, Management ... During stapedectomy (also known as stapedotomy), the top portion of the stapes bone is removed by breaking it or vaporizing it with a laser. The bottom part, or footplate, of the stapes remains fixed in place by the otosclerosis. A small hole (0.7mm) is then drilled or lasered in the footplate .
